PROJECT-BASED LEARNING

PHASE-I EVALUATION

Localkart

Team ID: DSCPP-III-2026-T113

Department of Computer Science & Engineering
Graphic Era (Deemed to be University), Dehradun
Academic Session 2026–27

Team & Mentor Details

Team Information

Team ID: DSCPP-III-2026-T113
Semester: 3rd
Section: J,K,G
Domain: *E-Commerce*

Team Members

1. *Shaurya Bisht – 2510012399*
2. *Mayank Ranjan – 2510011761*
3. *Raj Vardhan – 2510010483*
4. *Aradhay Singh – 2510011780*

Mentor

Mr.Priyanshu Rawat

Interactions completed: 2

Problem Statement & Motivation

Problem Statement

Local shopkeepers don't have an online presence, so customers can't easily order from nearby shops , they end up relying on big platforms like Blinkit/Zepto, which don't focus on local sellers. LocalKart bridges this gap by letting local shops to sell online and customers shop from nearby stores easily.

Motivation

- *Local shopkeepers don't have any online platform.*
- *Big apps like Flipkart,Blinkit don't really help small, local sellers grow.*
- *Connect local shops with customers*

Target Users / Stakeholders

- *Primary: Local shopkeepers nearby customers*
- *Secondary: Delivery persons, local community*
- *Benefit: Shops get online reach,*

Objectives

Project Objectives

1. *Build an online platform for local shops to sell their products*
2. *Let customers browse and order items from nearby stores*
3. *Make it easy for shopkeepers to add and manage their products*
4. *Test the platform to make sure it works smoothly*
5. *Show that local shopping can also be done online, quickly and easily*

Key Objective: *To connect local shopkeepers and nearby customers through one simple online platform*

Proposed Solution

Proposed Approach

1. *Shopkeeper adds shop details and products on the platform*
2. *Customer browses nearby shops and selects items*
3. *Order is placed and sent to the shopkeeper*
4. *Shopkeeper confirms and prepares the order*
5. *Customer gets the product delivered or picks it up nearby*

Key Features

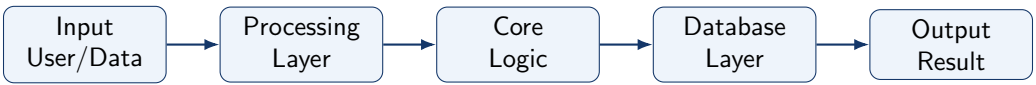

- *1.Local shop listing*
- *2.Easy product search*
- *3.Simple order placing*
- *4.Nearby shop location view*
- *5.Order tracking/status update*

Integration of PBL Course Concepts

Course	Concepts Applied	Project Module
Data Structures in C	*Arrays, Linked Lists, Hashing*	*Storing product*
OOPs with C++	*Classes, Inheritance, Objects*	*Order management*

Requirement:LocalKart shows real integration by using C++ classes to build the shop system and data structures to organize and manage the data smoothly

System Architecture / Workflow

Major Components

- *Shop Management Module*
- *Order Management Module*
- *Data Storage Module*

Data / Control Flow

- *Shopkeeper/customer enters data, system processes it, and result is shown*
- *Shop module and order module share data with each other*
- *Customer sees order confirmation, shopkeeper sees new order*

Technology Stack & Methodology

Technology Stack

- Programming: *C++*
- Database: *MySQL*
- Tools / Framework: *XAMPP*
- IDE: *Vs code*
- Version Control: *Git / GitHub*

Development Methodology

1. Requirement Analysis
2. System Design
3. Implementation
4. Testing
5. Evaluation

C++ (OOPs) with MySQL was used to build LocalKart's logic and store data reliably, following a step-by-step method from requirement analysis to final evaluation.

Initial Progress & Team Contribution

Progress Achieved

- *Study similar apps(like blinkit) to understand the idea*
- *Identified requirements–shop listing, product listing, order placing*
- *Designed the basic system architecture and workflow*
- *Implemented an initial module shop class using C++)*
- *Prepared MySQL database*

Individual Contribution

Member	Role	Contribution
Shaurya Bisht	*Lead*	*Planned project, coordinated team, worked on core logic*
Mayank Ranjan	*Developer*	*Built shop classes and order handling logic*
Raj Vardhan	*DB/Testing*	*Designed MySQL database and tested modules*
Aradhay Singh	*Developer/Docs*	*Helped with coding and ppt*

Roadmap, Expected Outcomes & References

Roadmap

1. Phase-I: Proposal & Design
2. Phase-II: Development
3. Phase-III: Final Implementation

Expected Outcomes

- *A fully functional Localkart app*
- *Faster and easier shopping for nearby customers*
- *Increase in sales of local shopkeepers*
- *Scope for additional features*

References

1. *C++ documentation*
2. *MySQL documentation*
3. *Online articles*
4. *Github*
